JCSM-445-66

12 JUL 1966

MEMORANDUM FOR THE SECRETARY OF DEFENSE

Subject: Air Munitions Plan for Southeast Asia (U)

1. (U) Your memorandum of 24 May 1966 requests the Joint Chiefs of Staff to give careful study to the question of what the air munitions consumption ought to be for Southeast Asia.

2. (U) The Joint Chiefs of Staff recognize the critical problems associated with insuring that stocks of air munitions are adequate to support requirements which include consumption in Southeast Asia while at the same time avoiding misapplications of resources through serious overproduction. They agree that this subject requires careful study. Such study is proceeding on a continuing basis, in consultation with members of your staff, to incorporate refinements in pertinent factors as these become known.

3. (U) The method of calculating Southeast Asia air munitions requirements was briefed in part to you in Honolulu in February 1966 and subsequently described more fully to members of your staff in Washington. In summary, the calculation stems from the JCS concept for military operations for Southeast Asia, from which are derived the combat air sortie requirements, whence in turn are derived the air munitions requirements. The latter derivation spans the entire air campaign for the in-place and projected aircraft inventory and reflects mission-by-mission, target-by-target, aircraft type-by-aircraft type, and ordnance station-by-ordnance station examination. It considers the specific weapon for each ordnance-carrying station for the aircraft and mission concerned, the allocation of certain stations to stores other than ordnance (for example external fuel), and all other relevant operational considerations. This method has been applied to estimation of requirements if "optimum" weapons were fully available and also to the allocation of existing assets, as discussed in the following paragraphs.

4. (S) Calculations based on optimum weapon loadings produce what may be termed an "optimum requirements" plan. Such a plan for CY 1966 is furnished in Appendix A hereto. As shown in that Appendix, monthly requirements for the 30 items there listed would average slightly less than 104,000 tons/month, excluding reserve but including training requirements.

5. (S) JCSM-317-66, dated 10 May 1966, subject: "Air Munitions Plan for Southeast Asia (U)," was a similarly developed plan for CY 1966, which, however, reflected the best available information on actual assets and production rather than optimum ordnance. This plan has been revised as a result of the Honolulu air munitions conference which ended 1 June 1966 and is attached as Appendix B hereto. It is a current capabilities plan, reflecting planned expenditures of available assets, which may be observed to increase to slightly above 60,000 tons per month by December for the 34 items there listed. The Joint Chiefs of Staff support Appendix B as their current plan for expenditure of available assets.

6. (S) The Joint Chiefs of Staff believe that the methods of calculation reflected in the Appendices are as closely tailored to the specifics of the operational situation as is reasonably feasible. Margins for error must nevertheless be recognized. Principal among the possible sources of error is that operations may not proceed as planned. National strategy may modify execution of the concept of operations in a direction which reduces consumption, or military initiatives by others than ourselves may require an increase. Because of the substantial lead time required for increasing ammunition assets in Southeast Asia, in a time of actual combat it is considered wise to support requirements on the high rather than the low side of consumption estimates, recognizing that, if consumption in any period falls short of plans, the resulting short-term excesses may be used to replenish war reserve stocks.

7. (S) The Joint Chiefs of Staff consider that operations can be effectively conducted at an ordnance expenditure rate between the optimum requirements shown in Appendix A and the available assets shown in Appendix B. They do not consider, however, that Appendix B provides an appropriate basis for planned future production, specifically for CY 1967. CINCPAC's CY 1967 air munitions requirements are expected to be received in July and to project some increases over CY 1966. After analysis and validation, these will be the basis for a JCS-recommended extension of the air munitions plan for Southeast Asia through December 1967, which will be forwarded to you at the earliest feasible time.

~~TOP SECRET~~

8. ~~(S)~~ Based upon the foregoing and pending the availability of CY 1967 estimates, the Joint Chiefs of Staff recommend proceeding at a rate of production of approximately 100,000 tons per month with provision for emergency expansion of production if required.

For the Joint Chiefs of Staff:

SIGNED

EARLE G. WHEELER
Chairman
Joint Chiefs of Staff

1/ a. These requirements support the CINCPAC SEA Combat Sortie Plan for PACAF, PACFLT, and VNAF included in JCSM-317-66
 These requirements support the following sortie loading:
 PACAF tactical 2.4g tons/sortie
 PACFLT (Navy-Marines) 2.20 tons/sortie
 VNAF 2.44 tons/sortie

b. MACV B-52 requirements are 550 GP and 50 BUI-3B sorties/mo May-Jul, and 750 GP and 50 BUI-3B sorties/mo Aug-Dec. Current CINCPAC allocation to B-52s will support 400 GP and 50 BUI-3B sorties/mo May-Oct, and 550 GP and 50 BUI-3B sorties/mo Nov-Dec 1966 as provided in JCSM-317-66.

c. RLAF requirement based on 43 T-28 acft at .8 sorties/month.
 2/ Stockage objective based on the following:
 PACAF, VNAF, RLAF - 45 days expenditure.
 PACFLT - Navy shipfills, Marine mount-out (15 day reserve) plus 30 days expenditure for each item.
 SAC - 30 days expenditure.
