Just watched this. Frickin' stellar job by Alan.

It's the Stepmother, who had little to no role in BP Agent Terry's life. She admitted to me she talks to this reporter. She is also the one who sends e-mails to Grassley's staff saying we are all involved in some grand cover-up.

There is zero basis for this accusation. Zero.zero. Its contradicted by the evidence. I spent two hours walking the Father and Stepmother thru the evidence, and at the end the Father said to me "In my gut, I still think it was a dirty agent."

So, that's what this clown reporter is operating off of. Nice profession.

The Mother, brother and two sisters directly told me on Thursday in the Mother's living room that they do not believe this accusation at all and dismiss it completely.

Ill see you in DC this week but let me know if you want to talk about this beforehand.
