Subject: Mexican HVT defendant in NDIL filed a notice of public authority defense

OIA recently earned that HVT ATF (son of CPOT ATF alias ATF and

[REDACTED] ATF who was extradited from Mexico to face drug trafficking charges in NDIL, filed a notice of a public authority defense. The Mexican press has picked up on this issue, and has run with a story that [REDACTED] ATF is claiming that the U.S. government, including DEA, FBI, and ICE agents, were complicit in his drug trafficking activities in Mexico and elsewhere. The link to the Mexican press story, with the headline “El Vicentillo: Mas rapido y mas furioso” (More fast and more furious) is pasted below. The public authority defense filing is attached to this email.

There was a status conference in NDIL this afternoon on the [REDACTED] DEA, ATF case. The public authority issue was not discussed in open court and a next status date was set for June 15. We spoke with the lead AUSA who told us that they had no idea the defense was going to file the notice, especially since they have been in negotiations since [REDACTED] DEA, ATF arrived in the U.S. regarding a potential cooperation agreement. The defendant has five attorneys, who apparently don't all agree on a coordinated defense strategy.

The AUSA also reported that there has not been any mainstream media coverage of the public authority defense issue, and a quick Google search only reveals a US-based blog that mentions the Mexican press coverage. However, according to the AUSA, there were two reporters from the Spanish-language press in the courtroom today, and their press office has received one press inquiry from a media outlet in Sinaloa.

Given the issues we're dealing with regarding Operation “Fast and Furious” issues, Molly asked that we alert you to this news, which could obviously add additional public scrutiny to our law enforcement efforts in Mexico if this story is picked up by other media outlets. Please let us know if you have any questions or want us to follow up with the Embassy or NDIL on any further issues.
