Gentlemen:

In response to your letter of October 23, 1946 from John Edgar Hoover, Director, we are forwarding by separate mail our specimen sheets of type manufactured by our company.

At the present time we do not have available any showing of our manufacture other than the specimen sheets mailed to you.

In accordance with your request we will forward our future specimen sheets to your laboratory as they are printed.

RECORDED 180-613-280

Dear Sir:

We are in receipt of your letter of October 23rd regarding the FBI Library of type face catalogs which you maintain.

We wish to advise that we do not manufacture type, merely buy from the factory and resell to our customers. Most of our type is bought through Bauer Type Founders Co., 235 E. 45th Street, New York City and Baltimore Type and Composition Co., 15-17 South Frederick Street, Baltimore, Maryland. I am sure that a letter to these concerns will give you the information wished.

Very truly yours,

Dear Mr. Hoover:

Enclosed are copies of the only two Old Fashioned Type Specimen Books we have published to date. Of course, you know these are types made before the 1890's, possibly a few in 1890-1900. We have approximately 600 more old-time faces we are using for press proofs only and many cuts, borders, ornaments, etc - not ready to show for various reasons - such as lack of help, incomplete fonts and little apparent demand. When and if they are ever published copies will be sent to you.

Mr. J. Edgar Hoover,  
Director,

Dear Sir:

Your letter of the 17th was received asking  
for copy of current type catalog.

At this time we have no catalogs, and we were  
under the impression your Department had copy of our 1942  
issue, which was our last printing. That copy with enclosed  
card shows all items to date, but of course prices are  
obsolete.

INDEXED RECORDED

80-613-266

HANDLED  
TOP DEK

As indicated, we have been short of catalogs for  
almost a year, and we are doing all possible to print a revised  
issue. This will be done just as soon as prices are established  
enough to enable us to do so, which we hope is early this coming  
spring season. We are now addressing catalog envelopes and you  
will receive one just as soon as mailing starts. As indicated,  
our previous printings are exhausted and we are limited to two  
or three copies for our office personnel, but a revised copy  
will be mailed at earliest possible date.

Very truly yours,

*Ross W. Thomas*

Manager.

Attention: Mr. J. E. Hoover, Director

Dear Mr. Hoover:

In reply to your inquiry of October 21st with reference to type face catalogues, we wish to advise that we are not manufacturers of brass type. We handle type on a jobbing basis and our sources of supply are Missouri Brass Type Founders, St. Louis, Missouri, and Service Engraving Works, 692 Broadway, New York City.

We are quite certain that you probably have these manufacturers on your list, but if you do not, we will be pleased to send copies of their catalogues for your files.

As a point of information, we believe there is a slight discrepancy between the actual brass type used and the face shown in the type catalogue, due to the fact that the catalogue is usually made of a lead type which is selected because it is a close approximation to the brass type that is manufactured.

If there is anyway in which we can be of assistance to you regarding type, we will be very glad to hear from you.

Attention: Mr. J. E. Hoover

HANDLED BY  
TOP DEK

Dear Mr. Hoover:

This will acknowledge your letter of the 18th regarding specimen books of type faces. May we advise you that we do not manufacture type. We sell type made by Baltimore Type & Composition Company, 15-17 S. Frederick St., Baltimore, 2, Maryland. They can supply you with their books and supplements.

In the future should we ever install type casting equipment we will be only too glad to furnish you any information you may desire.

Thanking you, and with best wishes, we are

INDEXED

Yours sincerely,

PRINTERS' MACHINERY & SUPPLY CO.

Dear Sir: New Type Collection

10/23/46

As per your request, I am enclosing a catalog, which is the only one I have at present and is far from being complete.

We are working on a new catalog & as soon as completed will mail same to you.

I have also placed your name on our mailing list, as you requested.

Very truly yours,  
Edward S. Eschinger

Mr. John Edgar Hoover, Director  
Federal Bureau of Investigation  
United States Department of Justice  
Washington, D.C.

Dear Mr. Hoover:

This is an acknowledgement of your letter of Oct. 17th requesting catalogs of type manufactured by this company. We are glad to comply with this request and are sending you one each of the two catalogs which we furnish the trade, and which shows all the type faces we manufacture in our foundry, and other type which we have available for composition for printers, advertising agencies, publishers, etc.

For a moment I will give you my background and you will understand that I can appreciate the usefulness of such information as we have in this plant. My war service began July 1941 and ended August of this year. The first two years being with G-2 of the War Department and the last three years as Chief of the Intelligence Division of the San Francisco Port of Embarkation. During all those five years I worked very closely with your San Francisco office, and on occasion, I had dealings with your Los Angeles office.

Although the type faces which we have in our plant could be duplicated in many other plants throughout the United States, within this area we would have sold combinations of types which are not common to all print shops. Further, our sale of foundry type is accurately recorded as to customer and type faces which he has purchased. Consequently, should your local office have occasion to identify the probable place of manufacture of some printed matter, we, with our knowledge of local plants, and a check through our books of what type faces the local plants have purchased from us, could probably indicate the likely place such matter had been produced.

Should any such occasion arise, I would personally handle the matter with the same discretion and same feeling were I still on active duty in the Army.

Ludwig-Duell Company  
30 Beekman Street  
New York 7, New York

Dear Mr. Mendez:

The sheets of border designs and other decorative material recently issued which you forwarded with your letter of October 23, 1946 have been received.

We would appreciate receiving a copy of your catalog of printers' rules, borders and decorative material and, when they are ready, a copy of the sheets bearing specimens of type which you have just started casting.

I wish to thank you for your cooperation in this matter.

Sincerely yours,

John Edgar Hoover  
Director

*News Type, Collector*

Dear Mr. Hoover:

*News Type Collector*

Thank you for your recent letter, we are sending ~~under separate cover~~ <sup>herewith</sup> sheets we recently issued. We have just started casting type and it will be about six months before we can get a sheet out, which we will be glad to send to you. Our main business heretofore has been casting printers rules, borders, and decorative material. We have a catalog of this - should you desire same please let us know.

Will be glad to cooperate fully on any matters of interest to you.

Sincerely,  
Ludwig-Duell Co  
Raymond Mandy  
Prop.

Gentlemen:

The FBI Laboratory maintains a library of the type face catalogs published by various manufacturers in the United States. These catalogs are used in connection with laboratory examinations of materials obtained in official investigations.

It would be appreciated if you will make available to us a catalog and supplements thereto containing type faces manufactured by you, and place the name of this Bureau on your mailing list to receive any future catalogs and supplements which you might prepare.

Your cooperation in this matter will be of material assistance to us. Please address future correspondence covering this matter and any material you make available for the attention of the FBI Laboratory.

Very truly yours,

John Edgar Hoover  
Director

Gentlemen:

The FBI Laboratory maintains a library of the type face catalogs published by various manufacturers in the United States. These catalogs are used in connection with laboratory examinations of materials obtained in official investigations.

It would be appreciated if you will make available to us a catalog and supplements thereto containing type faces manufactured by you, and place the name of this Bureau on your mailing list to receive any future catalogs and supplements which you might prepare.

Your cooperation in this matter will be of material assistance to us. Please address future correspondence covering this matter and any material you make available for the attention of the FBI Laboratory.

Very truly yours,

John Edgar Hoover  
Director

*Handwritten:* Review Type Collection

The Laboratory at present has three typeface catalogs which are used for reference purposes when the field requests the Laboratory to identify printing, whether it be in an extortion communication, on a fraudulent check, or other evidence submitted by the field for examination. The information is requested by the field so that it may assist them in identifying or locating the printing firm which prepared the checks or other material.

A representative and substantially complete reference collection should consist of approximately 55 typeface catalogs prepared by the various manufacturers of such equipment. The Laboratory seeks authorization to obtain these catalogs from the manufacturers which undoubtedly will be furnished without cost. It is estimated that the 55 catalogs will occupy approximately one drawer of a filing cabinet.

To supplement and serve as an index to the reference file of catalogs, the Laboratory desires a copy of the Seventh Annual Production Year Book which is priced at \$5 and printed by the Colton Press, Incorporated, 468 4th Avenue, New York City.

*Handwritten:* Requested by purchase X.C. 697 K

The Conference on September 25, 1946, composed of Messrs. Tolson, Tamm, Tracy, Callahan, Nichols, Morgan, Ladd, Hendon, Rosen, and Harbo; was unanimously in favor of the Laboratory proposal.

Respectfully,  
For the Conference

Clyde Tolson

The typeface catalogs are used a great deal in connection with the examination of fraudulent checks in connection with the printing contained thereon. There follow several cases which were readily available where these catalogs were used.

- (1) File 9-14207 In June, 1946, Los Angeles in connection with an extortion case stated, "It is requested that the Laboratory report on the printing identifying if possible the type of equipment which was used to write the message."
- (2) File 87-5904 In August, 1946, the St. Louis Field Division requested, "It is further requested that, in view of the fact that instant checks are printed checks drawn on a fictitious and non-existent insurance company, the Bureau Laboratory make an examination of both the paper and the printing and furnish this office with any information which might assist in identifying or locating the printing firm by whom these checks were made."
- (3) File 87-5241 In July, 1946, in connection with this case which is a very large National Stolen Property Act case involving checks, it was possible to advise the field division that it was believed that all of the checks in this case were printed in one printing establishment and the reasons were given therefor, which involved a study and comparison of the type used such as BANK GOTHIC BOLD, PARSONS, COMSTOCK, RANSOM SHADED INITIALS, STEELPLATE GOTHIC SHADED, et cetera. We were able to identify each of the different styles of type as having been manufactured by one company. All of this information was brought to the attention of the Investigative Division.

*Handwritten note on left margin: "New Typeface Catalogs"*

*Handwritten initials "J"*

The catalogs that we presently have are few in number and Mr. English informs me that he is amazed to find just how few we do have because when he is consulted by the examiners relative to the type used, he has recognized the type due to his experience and was amazed to find that we had no catalogs covering the type, which would substantiate his opinion.

It has been determined that the catalogs we do have are filed in the same drawer containing the catalogs on rubber stamps. It is not believed that all of the catalogs we desire would fill more than <sup>one</sup> file cabinet drawer, if that much, since their thickness would average about 3/4" *EX-18*

*RECORDED*

*80-613-172*

Mr. English informs me that he doubts there is any place in Washington where we could obtain the information desired in connection with the examination of type. If there was, it probably would be necessary to take the evidence or photographs thereof to the place for comparison, which would not be very satisfactory since we do have these comparisons very often.

*Handwritten date stamp: 59 OCT 31 1946*

The collection of type catalogs maintained by the Document Section at present is inadequate for the identification of the styles of type faces appearing on many recently printed documents. In order to rectify this condition, I should like to suggest that the Document Section acquire type catalogs from the various manufacturers of type faces in this country. These number approximately 55.

It is believed these catalogs can be obtained free of charge.

In addition it is my belief that we should obtain a copy of the Seventh Annual Production Year Book printed by the Colton Press, Incorporated located at 468 4th Avenue, New York City. This book sells for \$5.00. The Seventh Annual Production Year Book contains a Composite Type Face Directory, which is a compendium of type styles and should serve as an aid in locating a particular type face among the type catalogs of the individual manufacturers.

**RECOMMENDATION:**

*Ordered from N.Y.*

It is recommended that the Chief Clerk's Office of the Bureau be requested to obtain for use in the Document Section a copy of the Seventh Annual Production Year Book priced at \$5.00 and printed by the Colton Press, Incorporated, 468 4th Avenue, New York City.

Further, it is recommended that the attached letters addressed to five type face manufacturers be approved. The number of such letters will total approximately 55 in all.

The Records Section of the Bureau is carrying a file under the above title. This file concerns a collection of newspaper type faces. Since we have occasion to file matter on type faces other than news type, it is suggested that the title of this file be broadened to include type faces of all kinds.

## RECOMMENDATION:

It is recommended that the Records Section be instructed to change the title of the file presently carried as "News Type, Collection" to "Type Faces, Collection". The file bears the number 80-87.

MEMORANDUM FOR MR. EDWARDS.

Re: Reference Collection of News Type.

In connection with the reference collection of news type which is to be maintained in the Technical Laboratory Mr. Blackburn visited the Library of Congress on Friday, April 5th, where Mr. H. S. Parsons, Chief of the Periodical Division, referred him to the Division of Press Intelligence of the Department of Commerce.

At the Division of Press Intelligence Mr. Blackburn interviewed Mr. F. S. Gardphe who explained that his Division received copies of 375 newspapers each day from most of the cities with a population of 50,000 or over. Mr. Gardphe indicated his desire to cooperate with this Bureau and stated that he would get together one copy of each newspaper in their files and advise the Bureau when they would be ready in order that arrangements could be made to transfer them to the Technical Laboratory.

Your advice is desired as to whether the preliminary procedure for obtaining newspaper samples from the Clipping Bureau as indicated will be proper.

Respectfully,

*E. P. Coffey*  
E. P. Coffey.

Reference is made to Mr. Egan's memorandum to the Director dated November 27, 1944, especially to the penned notation thereon approved by the Director to the effect that this file should be reviewed at the end of 1945 to determine its value. Briefly, in his memorandum Mr. Egan considered the history and use of the file, arriving at the recommendation that it should be continued. As indicated, this was approved, subject to the proviso that the file would again be reviewed at the end of 1945.

This file was instituted in 1937 in connection with the Matnap case and in years past has been used on several occasions in other cases such as the Levine case and the case involving the submission of extortion letters to John D. Rockefeller. This file has been used in connection with these and other similar extortion cases in that when rubber stamp printing appears on an extortion note we can search it against the file and there is a probability we can advise the Field as to the maker or manufacturer of the rubber stamp printing set used.

At present the file is up to date, consisting of some 156 specimens. More particularly, these consist of approximately 75 catalogs and booklets of the various stamp manufacturers, 17 standards of impressions taken from common styles of type, 18 rubber stamp sets and 46 dater stamps. The types or different kinds of rubber stamp printing sets are myriad and in attempting to understand this file and its operation one should be mindful of the fact that we do not have and it would be virtually impossible to have impressions from or catalogs covering every known manufactured rubber stamp printing set. In other words, many of these things are the kind sold at the dime store and it has been found that it would just not be economical to cover all possibilities. However, the file as it has been operated covers the better known manufacturers and the printing sets which are most widely distributed.

As Mr. Egan found, it is well nigh impossible to accurately appraise the exact value of this file. He mentioned it had been used in the Matnap case, the Rockefeller case, the Levine case, the Williston Theatre case and the Judge Ralph E. Jenney case. However, he pointed out that according to the memory of Bureau supervisors, the file had not been of any value since May of 1944 in connection with kidnaping and extortion cases. Since Mr. Egan's survey the file has been used approximately five times and in two of these cases, both extortion investigations, it was possible to positively or probably identify the source of the rubber stamp printing set used in preparing the extortion letters. At least we were able to tell them the probable manufacturer of the sets. However, frankly, it cannot be said that this information solved the cases for the Field.

EX-38

*RAH*  
 (7)

Memorandum to Mr. R. T. Harbo

As to the cost of maintaining the file, Mr. Egan pointed out that such cost was practically negligible. As a matter of fact, it has been even more negligible during the past year. The examiner on the file has spent only about four hours throughout the entire year in keeping it up to date and in taking care of certain necessary correspondence. Furthermore, the space required to house the file is practically not worth mentioning. The entire file takes up only two drawers in an ordinary four drawer file cabinet. The various catalogs and specimens are absolutely free to the Bureau.

RECOMMENDATION: Although it is not possible to accurately evaluate the file in terms of the usual standards of convictions and identifications, there is a certainty that it costs practically nothing to keep this file. Although rubber printing sets are not used too frequently, we know through past experience that they are occasionally used and sometimes in rather important cases, such as the Matnap case for example. I strongly recommend that we maintain the file in its present condition, keeping it up to date as we have in the past, as I think it obviously has potential value, if not real value. Moreover, I would think that any real good Document Laboratory would be presumed to have at least some records (such as this file consists of) relating to rubber stamp and printing devices as they do constitute one method of writing.

Dear Sir:

Re: GERMAN ARCHIVALS  
Col. - SECURITY MATTER - G

Reference is made to Bogota radiogram to the Bureau, No. 283, in instant case.

Among the property of the former German Legation in Bogota turned over to the Colombian Foreign Office is a number of rubber stamps used by the German Legation.

A representative of this office has made impressions with each of these stamps on twenty-five sheets of bond paper which are transmitted herewith for the Bureau's Rubber Stamp File.

Attention: Mr. John Edgar Hoover, Director

Gentlemen:

We have been holding your letter dated March 30, 1945 in which you ask for our latest catalog on rubber stamp sets, date sets, etc., in the hopes that our new Encyclopedia of Product Marking, Catalog No. 65 would be completed. We have had a great deal of difficulty in getting this catalog completed, therefore, we will not be able to send it to you for at least six (6) months. However, the catalogs which you have at present, namely, Nos. 62, 63 and 64 are our current catalogs.

We thank you for your interest and are making a note to send you our new catalog whenever it has been completed.

Yours very truly,

PANNIER BROS. STAMP CO.

Mr. Jones	<input type="checkbox"/>
Mr. Quinn Tamm	<input type="checkbox"/>
Tele. Room	<input type="checkbox"/>
Mr. Nease	<input type="checkbox"/>
Miss Gandy	<input type="checkbox"/>

In accordance with instructions I have examined the file and specimens in connection with the above.

This file was started approximately February, 1937, as shown by Serial 1 in this file. The file consists of 75 catalogs and booklets representing sixteen manufacturers; one catalog from the American Type Founders, two booklets from the Government Printing Office, and one catalog of the Multigraph Company, as well as rubber stamp impressions and the small 10¢ store type of handprinting set. These catalogs and rubber stamps are contained in two regular file cabinet drawers made up of about 1/2 catalogs and 1/2 rubber stamps. There are approximately two days' pending work, no delinquent work or deferred work in connection with this file.

This file was set up in connection with the Matnap case, and a comparison of the letter in this case with the known standards indicated that it was printed with a dater stamp. Comparison of the extortion letters in the John D. Rockefeller case determined that these were written with a rubber stamp and the manufacturer's name was furnished to the Field. In the Levine case it was determined that the ransom letters were written on a dial toy typewriter and this information was furnished to the Field. In this way, when ransom letters are received in the Bureau which appear to be printed or made from a set of rubber stamps, the comparison is made and the Field is advised of exactly what was used and who manufactured the particular kind of type. This of course is a standards file. In other words, it is referred to like the ordinary person would refer to a dictionary for information.

### RECORD OF ACCOMPLISHMENT

A. It is extremely hard to determine what value, if any, this file has been in connection with investigations in the Field. The administrative file, 80-613, fails to show any information in this connection. I have talked to the supervisors in the Laboratory and they have furnished me the names of the Matnap case, Rockefeller case, and the Levine case; the Williston Theatre case, Judge Ralph E. Jenney case, Unknown Subject, anti-Semitic League and the case Unknown Subject, anti-Administration and anti-Semitic Matter sent to the Italian-American Labor Council, New York City. In talking to the extortion and kidnaping supervisors who have been in charge of the above classifications in the Bureau since May of 1944, they advised me that since that time the rubber stamp and printing file has been of no value to them in any of their cases since the above date.

RECORDED

B. No prosecutions or convictions have been obtained because of the maintenance of this file as far as I could determine from the records.

150

112  
JAN 26 1945

*[Handwritten signatures and initials]*

43000

COST TO OPERATE

The present supervisor in the Laboratory in charge of this file advised me that since July 1st to date he has spent only approximately five hours on this file. This would indicate that this file costs the Bureau very little to maintain.

As previously stated, this file only occupies two drawers in a four-door cabinet.

It is not believed that the cost of the operation of this file could be justified in that manner. However, as previously stated, this is a reference file which takes up very little room, costs very little to operate, and is referred to each time a stamped or printed extortion or ransom note is received and the Field is advised or the police advised of the type of printing set which was used and the name of the manufacturer so that it narrows down the searches by the Agents in the Field.

RECOMMENDATION

I recommend in view of the above that this file be continued.

*I Concur.*

*ED 12/9/44*

*In view of possibility of increase in extortion cases in post war period, I recommend continuation.*

*ASL*

*I suggest we continue file and review its value at end of 1945*

*OK.*

JME:HAM 80-698 cc-80-613

December 19, 1944

Mr. Coffey

Mr. Martin

Passports and Identity Papers

Mr. Burgess Smith, Director, Research Laboratory, The Todd Co. Rochester, New York, in the company of Messrs. Charles D. Snead, Chemical Sales Division Eastman Kodak Co. 350 Hudson St. New York City, and Robert W. Carver of the Fred S. Carver Hydraulic Equipment Co., 345 Hudson St., New York City, came into the Laboratory on December 12, 1944 and were interviewed by Messrs. Miller and English of the Document Section.

This was the second visit of Messrs. Snead and Carver, who visited the Laboratory previously on November 10, 1944 and were interviewed by Messrs. Dingle and English.

On their November 10 visit, Snead and Carver left several incased cards including one used by the War Department, A.G.O. Washington, D.C.

During the December 12 interview, Mr. Snead gave the impression that he thought the Laboratory was testing their identification cards and might give him an idea as to their security value. No such indication was made by the Laboratory Technicians who interviewed these gentlemen on November 10. It would appear that they would like to have the Laboratory test their cards and, if we found a degree of security in them, they would proceed to try to sell the cards to the State Department for the Allied Military Government Officials in the liberated countries of Europe. No indication that such tests would be approved by the Bureau was given, and it was reiterated that the primary interest of the Laboratory in such identification cards was in connection with the detection of forgery.

Mr. Tolson Mr. Burgess Smith of The Todd check writing machine firm showed several  
 Mr. E. A. Tamm types of safety papers and safety identification cards on which he has been  
 Mr. Clegg working.  
 Mr. Coffey \_\_\_\_\_  
 Mr. Glavin Among these were 6 sheets of check safety paper. One of these specimens  
 Mr. Ladd have as their principle safety factor the over printing of a fine mesh design in  
 Mr. Nichols several colors or tones of one color and the use of a fluorescent material in  
 Mr. Rosen the paper. Mr. Smith said this type of safety paper was not in commercial use  
 Mr. Tracy yet. It had been proposed for sale beginning the first of this year in all  
 Mr. Acers probability, he said, it will be available to the public by spring. He said  
 Mr. Carson the government may have it any time that it may wish. The other three are  
 Mr. Harbo samples of safety papers in which fluorescence plays the predominant part. One  
 Mr. Hendon bears a visible over all design which disappears when viewed under ultra-violet.  
 Mr. Mumford Another appears to be blank when viewed in visible light but bears an over all  
 Mr. Starnes design when viewed under ultra-violet. The third has a material in the paper  
 Mr. Quinn Tamm \_\_\_\_\_  
 Mr. Nease \_\_\_\_\_

which fluoresces brilliantly under ultra-violet and the watermark design becomes more visible under ultra-violet. These are attached hereto.

Mr. Smith said that frequently the Todd Co. makes safety paper bearing an individual design for a commercial house and that he has in his Laboratory one specimen of each of these individual designs which have been produced to date. He also states that he would be very happy to arrange to have the FBI Laboratory receive specimens of each of these individual types of papers as they are prepared in the future. Mr. Smith made this offer without prompting.

In addition, Mr. Smith showed two Identity Cards which are in the experimental stage. The fundamental Safety factor of these cards was a layer of small pieces of cellophane of varying thicknesses placed beneath a transparent photographic print of the person whose identity card it is which transparent print may be viewed clearly when held up to a light source. The unusual note about these cards is the fact that when a polaroid is placed on each side of the transparent photograph the design in which the small pieces of cellophane have been cut becomes visible in varying colors which change as the polaroids are revolved.

Mr. Smith stated that the fluorescent element appearing in his firm's safety papers was not going to be made known to the public even after the paper was on the market. He also stated that the latter three types of safety paper mentioned above were entirely in the experimental stage. He gave no indication as to when these would be on the market.

Mr. Smith showed several additional identity cards and safety papers, all using variations of the fluorescent principle many of them bearing designs printed in material which fluoresces in one band overprinted with an ink which fluoresces with a slightly different band. He also is using invisible printing inks which absorb ultra-violet light. A medallion printed in this ink is visible only when printed over other fluorescent material. The medallion design has a dark appearance in the fluorescent field.

ADDENDUM 12/20/44 - All of these security steps are very fine and should be taken advantage of in any situation wherein <sup>the</sup> cost warrants. However, it must always be kept in mind that these secret testing devices are 100% effective only until someone "in the know" sells out to the crooks or to the enemy. Then, of course, they can be counterfeited.

SECURITY MATTER - G  
SEDITION

ATTENTION: FBI LABORATORY

Reference is made to the reports of the FBI Laboratory in this case which, at that time were captioned, "Card Bearing German Inscription Commencing, 'Americans! Awaken to the Fact. . .'" The Laboratory reports are dated September 18, 1943, March 4, 1944, and March 27, 1944. The Laboratory file numbers set out are 100-231-388-1 and #D6579, D-12077CT and #D13823CT.

Enclosed herewith are seven 3-inch strips of metal, each of which holds rubber type. They were used to print the cards previously examined by the laboratory in this case.

For the information of the laboratory, the cards in the referenced reports were printed on a child's handprinting press like the ones described in the laboratory reports and in a catalogue by the Superior Type Company, 1800 West Larchmont Avenue, Chicago, Illinois. The printing press used is #8401. It is a small hand set called the Rotaro Swiftset Press, manufactured by the T. S. T. Company, U. S. Patent #29011499.

The enclosed type and metal holders may be retained by the laboratory and need not be returned. It is sent to the laboratory for whatever use it may be in the known specimen file.

For record purposes and for inclusion in the administrative file there is set forth below the writeup on the above captioned file for inclusion in the Annual Report for the fiscal year of 1944.

Among the many methods used by the writers of anonymous letters, the rubber stamp and dater stamp have been used as a means of conveying the unhealthy thoughts of character assassins to innocent victims, imposing sorrow, worry and even death.

To aid in the various investigations conducted by the Field Divisions of the Bureau with respect to cases in which anonymous letters have been written with the use of the rubber or dater stamp, in 1937 manufacturers of these implements throughout the country were contacted for the purpose of making a collection of type or stamp impressions in order that the source of a rubber stamp impression appearing on a threatening letter might be more readily ascertained. It was found through these contacts that most of the larger companies were equipped to manufacture rubber stamps to order, but did not maintain a stock of all the stamps manufactured by them. It was readily determined that a file of this kind would prove both costly and inefficient, due to the great number of duplications. Accordingly, efforts were made toward securing catalogues from rubber stamp manufacturers showing the principal styles and sizes of the rubber type supplied by them. Information was developed that a type style might originate with any one of three principal sources or industries, namely: the engraver, the type founder, or the rubber stamp manufacturer. It was found that the catalogues obtained from the leading rubber stamp manufacturers contained and represented the finished rubber type faces, shown in actual size, that are made available to the public and the writer of an extortion or threatening letter.

Examinations involving rubber stamp impressions and having for their purpose the discovery of the source of the rubber stamp proceed along the following lines:

- EX - 50 RECORDED 80-613-147
1. All catalogues in the file are carefully searched for the style and size of type involved.
  2. If the style and size of type are not located in the catalogues, contact would then be made with a representative of the Government Printing Office in an effort to identify the style and size of type.
  3. The Trade Magazine, "Marking Devices", or a representative of the Marking Devices Association in Chicago, Illinois, is next contacted for information relative to the probable source of such type.
  4. Individual companies whose names have been obtained as a result of these three steps would be contacted for information relative to its distribution.

The Rubber Stamp File now contains approximately twenty catalogues of the various companies engaged in the manufacture of rubber stamps and dater stamps. From time to time the small, inexpensive, five-and-ten cent variety of printing sets have been received in the FBI Laboratory for examination and comparison with questioned impressions. Some of these sets received in connection with the Matson Kidnapping case and other cases have been filed as a supplement to the Rubber Stamp File. The rubber type contained in these sets is readily available for comparison with impressions of questioned type submitted in the investigations involving a rubber stamp.

Dear Sir:-

During the course of a recent investigation conducted in the Newark Field Division, it was necessary to call upon Mr. THEO. KAUFFIELD, Vice President of the American Type Founders Sales Corporation, 200 Elmora Avenue, Elizabeth, New Jersey, for his analysis of certain specimens of type used in the printing of bank checks. His cooperation and assistance in the matter was splendid and worthy of commendation. Several days following the interview with Mr. KAUFFIELD, The Newark Field Division received the enclosed "BOOK OF AMERICAN TYPES", which is the latest Specimen Book issued by the AMERICAN TYPE FOUNDERS.

In view of the fact that such information contained therein might prove useful in the Bureau Laboratory work, the book is being forwarded to you.

Very truly yours,

April 22, 1942.

Mr. John Edgar Hoover, Director  
Federal Bureau of Investigation,  
United States Department of Justice,  
Washington, D.C.

Dear Mr. Hoover:

Acknowledging receipt of your letter of April 18th requesting catalog or pamphlets listing or describing the various articles of fireworks that we manufacture or distribute.

For the past several years we have been doing our selling in the name of Ohio Display Fireworks Company, which is owned and operated by the same stockholders of our Company, and using the Vitale Fireworks Mfg. Co. as a manufacturing unit only.

We are enclosing herewith a copy of our 1941 Catalogue as we do not have any catalogue for this year and do not believe that we will have one as we are manufacturing Very's Signal Cartridges for the Army and Navy and are not going after any of our regular display business.

We have some fireworks on stock which we may dispose of this year and if we have any prospects will sell them out of our 1941 Catalogue.

Trusting that this will meet with your desired request, remain.

Very truly yours,

VITALE FIREWORKS MFG. CO. INC.

Mr. John Edgar Hoover  
Federal Bureau of Investigation  
WASHINGTON, D.C.

Dear Mr. Hoover;

I have begun to look for your annual request for a copy of our catalog, and, as per your letter of the 30th January, am pleased to send you a copy of our 1942 edition which is being mailed under separate cover.

However, due to the war, we haven't made many changes in this year's edition and still retain the same number, viz. 403.

Now, more than ever, we are glad to co-operate with our government.

With kindest regards,

Yours very sincerely,

JOHNSON SMITH & COMPANY

FOR YOUR COMMAND PERFORMANCE !

Two great artists to entertain you in your own home...  
GERTRUDE LAWRENCE, star of "Lady In The Dark," and EDMUND  
"The Wookey" GWENN.

You'll laugh a bit - You'll cry a bit - and you'll  
thrill to Gertrude Lawrence as Daisy Oggins in "Air Raid  
Shelter," and I know that Edmund Gwenn as the courageous  
old sea captain will leave you breathless and stirred with  
his performance in "Dunkirk."

Two outstanding poems authored by Jill Shulman - Two  
poems that tell the true story about the people who are  
really fighting, and winning, this war for the Democracies!  
Two poems, written in a down to earth manner you'll love -  
Highlighted with humor and packed with all the dramatic  
punch of a thousand headlines !

Send in now for your album of AIR RAID SHELTER,  
starring Gertrude Lawrence, and DUNKIRK, starring Edmund  
Gwenn. Not only will you be adding to your own listening  
pleasure by purchasing these splendid Victor Recordings,  
but you will also be helping the BRITISH AMERICAN AMBULANCE  
CORPS to carry on a most humanitarian undertaking - Aid To  
Great Britain And Her Allies - for the proceeds from the  
sale of these records all go to the B.A.A.C. Fund.

These two 12 inch Victor Records, in a special album  
sell for only \$ 1.75.

Either record, sold separately, sells for the  
regular price of \$ 1.10 - and these prices include the  
new Federal Tax.

Sincerely,

*W. Luxford*

**FILL OUT THIS ORDER BLANK - DETACH AND MAIL.**

Enclosed please find check money order for \$  
for complete album containing AIR RAID SHELTER  
and DUNKIRK. Priced at \$ 1.75 (Federal Tax included)

Please send me recording of AIR RAID SHELTER  
only at the price of \$ 1.10 (Federal Tax included)

Please send me recording of DUNKIRK  
only at the price of \$ 1.10 (Federal Tax included)

Make checks payable to the

BRITISH AMERICAN AMBULANCE CORPS, INC.

420 LEXINGTON AVENUE  
NEW YORK, NEW YORK

Dear Friend:-

Knowing your genuine desire to aid in the tremendous work the British American Ambulance Corps is undertaking for the suffering people of Great Britain, I am sure you will be pleased and interested in our latest patriotic achievement - our R. A. F. drinking glasses.

Gay -- dashing glassware to brighten up any occasion. These gracefully tapering glasses are crystal clear with a chip proof rim, banded in gold leaf, while just below is the colorful emblem of the Royal Air Force - the outstretched wings in gold leaf, surmounted by the Air Force crest - the green and gold laurel wreath encircling the white shield which bears the letters R.A.F. Below the wings and crest is the R.A.F. target in red, white and blue. The entire design has been fired on the glass to prevent peeling or washing off. The glass itself is the popular five inch size with the attractive half inch thick base.

These R.A.F. glasses sell for only \$1.00 a piece, and the proceeds from their sale will help to carry on the huge task, we of the British American Ambulance Corps, have undertaken in the name of England and all the Democracies.

You can order as many as you wish from one to one-hundred. Use them as a decorative item for your home, or better yet...gather your friends - fill your glasses full and DRINK A TOAST TO HITLER'S GHOST.

This letter is sent to you through the courtesy of JOHNSON SMITH & CO., DETROIT, MICHIGAN, who will also accept orders if you prefer.

Sincerely

A handwritten signature in cursive script, reading 'Nola Luxford'.

Mr. J. E. Hoover  
Director  
Federal Bureau of Investigation  
United States Dept. of Justice  
Washington, D. C.

Dear Sir:

Replying to your favor of the 30th ultimo, addressed to the attention of the writer, would say that we have published no further catalogs than our No. T-83 and No. G-66, of which you state you have copies.

We doubt very much under present emergencies that we will print any more catalogs as we will use our present catalogs until things adjust themselves when we can again have the opportunity of publishing a new type catalog.

Yours respectfully,

THE IRWIN-HODSON COMPANY
