(U) IRRG responded to an email from an NSA Privacy Act request case processor, inquiring about public release of NRO persons' names. IRRG provided guidance on customary NRO policies and related legal justifications, and volunteered to take a look at the small set of documents in question. Because this was a simple, straightforward case, IRRG was able to provide a definitive answer to the NSA questions, specifically identify the NRO information that required protection, and enable movement toward a more timely response to the requester without the minimum 1 week to 1 month delay that would have likely resulted had we arbitrarily required a "formal" consultation request. The "quick solution" in this case was appropriate, and the email exchange provides both agencies with sufficient evidence of adequate and proper review of equities by the actual information owners prior to release determination.

(U) The [ ] Lead assisted IRRG Production Manager [ ] by identifying potential source authority documents for use in modeling enhancements and updated being considered for IRRG governance documents.

Your adherence to FOIA policy is commendable, and the transparency (as much that can be expected from your agency's line of work) is worth noting. There are government agencies outside of the Intelligence Community that cannot meet the standards of quality that your agency has regularly set with its FOIA program....
