Letter to SAC, Tampa
Re: FAIR PLAY FOR CUBA COMMITTEE (FPCC)
97-4196

have not indicated any mass reversal of past pro-Castro -
Cuban sympathies. They should, therefore, continue to be
considered potentially dangerous to the internal security of
the United States until such time as positive information is
developed indicating to the contrary.

Recipients should also be alert for any continued
activity on the part of individual FPCC chapters and/or
continued activity of FPCC leaders and supporters under a new
organizational affiliation. In this regard it is noted
WF 1282-S has pointed out that the disbanding of the national
FPCC would not affect the Committee for Latin-American
Understanding (CLAU) since this group no longer maintains
its affiliation with FPCC in New York and is an independent
organization. The Bureau should be kept appropriately advised
in form suitable for dissemination of any such activity.

NOTE:
Buairtel 12/18/63 instructed recipients to immediately
review files concerning FPCC to insure that all local and national
leaders are included on SI and other individuals sufficiently
active in FPCC and related matters are also on SI or Reserve Index
where warranted. Field was also instructed to be alert to
insure that pro-Castro propagandists and apologists such as
Lyle Stuart, Waldo Frank and others whose organizational
activities did not qualify them for SI but whose writings,
publications, etc., were sufficiently inflammatory to so warrant.
The field was instructed to review these cases in line with
events following assassination of President Kennedy and consider
future action, if warranted. Bureau is to be advised as to
results of this review.
