The following is a retyped copy of an illegible copy in the ZRNICK (1963) Vol I File. (BOX 10, Job #75-752).

Periodic Activity Report 962 L

Date: ?
Presumably Dec 1963.

B. PAMELA

In addition to the regular bi-weekly schedules held on 10 and 24 November, a special schedule was held on 29 November, as was done in the case of AMAPOLA.

Among various matters dealt with in the message transmitted on 10 November, one in particular was of high interest. This was the request for a man to be chosen to handle communications in cases of emergency, inasmuch as it would be more difficult to accomplish this as "the struggle worsens." An exhaustive report on all aspects of counterrevolutionary groups and activities was also requested of the agent.

On 24 November (1963), as in the case of AMAPOLA, a special code was set up to enable "A--CH" (illegible) to report by cable directly to drops in Cuba on the situation in Puerto Rico after the assassination of President Kennedy. "SANTOS", the agent XXX who actually receives all messages transmitted to PAMELA was to contact "AB--N" (illegible) and have him report on the development of any of the following situations: (1) - if a contingent of "GUSANO" Cubans
has arrived there; (2) - if mobilization of resident "GUSANO" Cubans is noticed; (3) if mobilization of U.S. forces is noticed; (4) - if the Cubans who arrived and those who were there before have "developed circulation;" (5) - if activities of repressive organs against popular forces have increased. A special transmission was scheduled for the following Thursday at the same time.

As there were no adverse developments in the situation after the President's death, this subject was not dealt with in the special transmission made on 29 November (1963).

C. ROBERTO

(Para 3) On 25 November the agent was asked to report on the reaction to the assassination of President Kennedy by governmental, right-wing and left-wing circles. The agent was also asked to report the status of plans of aggression against Cuba.

A. AMAPOLA CUIS AGENT IN THE U.S.

(Para 5) Cuban authorities were obviously concerned about reactions and possible repercussions against Cuba as a result of President Kennedy's assassination. In the message of 24 November a special code was set up for the agent by which he could report by cable to Havana any unusual activities such as "YANKEE" concen-
trations, mercenary concentrations, increase in repression of Cuban and leftist sympathizers, and any disappearance of active counterrevolutionaries. In addition a special schedule was set up for Wednesday, 27 November. The purpose of this schedule was undoubtedly to pass special instructions to the agent in case developments arising after the assassination adversely affected Cuba. A full report via Candi*** (probably in secret writing) was requested on the reaction of the "GUSANOS" (Cuban exiles) and the Republicans to Kennedy's death.

***For information on Candi and a possible identification of Candi, refer to the Cuban teltaps. The taps show that the wife (Marta) of a known DGI officer, Oscar CONCEPCION Mendoza made the following statement: Tell LLAGOSTERA to tell Oscar not to forget the Candy. This statement is decidedly non-sequitor in the context of the conversation.
V. \textbf{SECRETARY ACCORDINGLY}

1. \textbf{GENERAL}

Regularly scheduled clandestine voice broadcasts continued to be made to agents ACMI, BACZA and SAMIR. The only other voice message which voice broadcasts was "RADIO LAVO"

2. \textbf{ACMI}

On the occasion of 3 November, the agent control station in Moscow requested that the agent was using

information in his cover writing messages for which no plain text value has been provided in Canada. Information was requested on the "SOMA" in order to determine the

route (in Chile) in which her was located.

On 16 November, the agent was told that the plan to deliver $3,000.00 to the agent (one message transmitted to Russia October 1, 1963) in New York had been cancelled. The

same is to be delivered personally, supposedly in Vinon, Canada, after 10 January 1964. The agent was instructed to acknowledge receipt of the book "KAL, DAZ" which will be sent to Chile, one of the letter drops (one

transmitted on 10 October), by sending a cable to the above. He was told that "all letters directed to and from the same were also included. Chile has sent (MBO), her son Felix, and grandchildren, husband, siblings, cousins, and friends. This information

was to add the agent in writing extensive overt tests as a security measure in covering the agent writing included

in each letters.

On 17 November, the agent was instructed to deliver

handwritten manuscript with the subject of recruiting area for the

areas of the revolution. Marissa visited an office at

14 J.L. Vidal (actual address: 1807 West Flagler Street, Miami) and handles business since as various, visas, and travel. The agent was instructed to proceed very cautiously with

the matter, varying the time objectives and items and still to make at least one contact with the subject. Miami is reportedly a center of activity. The "revolution and was access to information. No date, Mexico, was also visited a \textbf{FASCISTA}.

Finally, a request was made for plain text values of inter-

national mail that the agent was using which were not sent by

course. Information was provided on the latest activities of

similar families.
The agent was instructed not to use secret writing or<br>disguised important matter, other than writing in Cuba until<br>further notice. Hence it was possible that the agent was<br>instructed not to write to her any more. As a point of<br>motive, regarding damage to Cuba, the action in which<br>no one is involved is the "American Driving School." The<br>name of this enterprise is the name of a Cuban newspaper,<br>Cuba." On the evening of 27 November, a stick of dynamite was<br>placed on the ledge of the large window in the front of<br>the office. According to newspaper accounts of the<br>incident, the window was damaged and the furniture<br>inside was slightly damaged as a result of the explosion.<br>No one was present in the office at the time, and it is<br>not known if the act was committed against Cuba or<br>the power of the driving school.

Cuba authorities were obviously concerned about<br>prosecutions and possible repercussions against Cuba as a<br>result of President Kennedy's assassination. In the<br>evening of 24 November, a special code was set up for<br>the agent by which she could report by cable to Havana<br>any unusual activities such as "ECONOMY," concentration<br>camp, or any other defiance of the "American Driving<br>School." Cuba told authorities, and any disappearance<br>of agents or even a single person. In addition, a<br>special cable was set up for Wednesday, 27 November.<br>The purpose of this cable was apparently to pass special<br>instructions to the agent in case developments arising after<br>the assassination adversely affected Cuba. A full<br>report via cable (probably in secret writing) was received<br>on the occasion of the "ECONOMY" (Cuba added) and the<br>television to Cuba's booklet. Havana acknowledged receipt<br>of the instructions it had been sending. Additional<br>information of Cuba was also included. It was never<br>possible that the "ECONOMY" in Havana is "1545 R. 5. Door<br>Street (K5)" and his telephone number is 552-514. It has<br>two armed guards who are armed with a small automatic<br>firearm. It is said to be in the city of Havana.

The broadcast transmission was made in the preceding<br>papers and was done at the regular hour and on the usual<br>frequency. The message was cut out with care and the text<br>spotted in red with a red mark to indicate that there was nothing to be transmitted to<br>the Graf on that day.
In addition to the regular weekly schedules held on 26 and 29 November, a special schedule was held on 29 November, as was done in the case of APEX.

Since various matters dealt with in the session conducted on 14 November, especially, were of high importance, it was the decision for a new to be taken to ensure continuance in case of emergency. However, as it would be too difficult to accomplish this in the usual manner, an extensive report on all aspects of Governmental activity and activities was also requested of the agent.

The purpose, as in the case of APEX, a special code was set up to enable APEX to report by cable directly to APO in case of the absence in four days after the conclusion of the ad hoc Assembly. Thus, the agent was actually relieved of messengers accustomed to APO, and sent his report on the development of any of the following situations: (1) If a contingent of Cuban forces arrived here; (2) If deviation from the APO course is noticed; (3) If utilization of Cuban forces is noticed; (4) If the Cuban who arrived and those who were here before have developed dissension; (5) If activities of Cuban forces against the popular forces have increased. A special transmission was scheduled for the following Thursday at the same time.

As there were no adverse developments in the situation after the President's death, this agent was not dealt with in the special transmission made on 29 November. Instead, similar matters were covered in this message. The Director, Due to illness of the PM of HRF Party, was allowed to present himself at the Cuban Embassy in Mexico. Jose R. Velasquez, of the HRF (party), was not given clearance (to do the same) until the matter was discussed with HRF, because too many details were held on him. The matter of cable to PM J. Velasquez was reported and the agent was to indicate the route and date of the trip. The agent was requested to peruse 100,000 worth of internal revenue stamps from Mexico, in accordance of 30.50; hawks was to repay the agent (APEX) for this expenditure. Inquiries to accomplish all the foregoing actions in due time to Havana, so that they might be discussed fully in New York.
This agent traveled to an unidentified country from the USA, coded EIC to meet "Uncle Sam" from Havana, while he was away on this trip, a daily message of thirty words, which was transmitted on two of his regular schedule. The two word daily message was transmitted and on his regular schedule for 4 November. The daily message was also transmitted on his next regular schedule on 11 November. The purpose of these daily messages was to assess the attitude of the agent, and to keep him aware that unusual circumstances were being maintained with the agent during this time.

On 15 November, the agent was asked to report on the decision by the assassination of President Kennedy by presidential, political, and military circles. The agent was also asked to report on the status of plans of aggression against Cuba.

A. LIFE VIA RADIO

The only voice transmission intercepted other than the three regular and established activities noted in the previous section were those which used the call sign "KANSAS CHARLIE." On 15 November, at 1044-1200, a 6:00 group message was transmitted on the primary frequency of 7200 kHz and repeated on the secondary frequency of 7210 kHz. Formal clandestine procedure was utilized, with the exception that no sign off was noted on the secondary transmission. Teletype were taken from the message and they resulted in placing the transmitter in the general Havana area.
later on 13 November, at 1540-1630, a 72 group message was transmitted on the primary frequency of 7240 kc and repeated on the secondary frequency of 7176 kc. Again, no sign-off was noted at the end of the secondary transmission. On 24 November, at 1502-1536, an 80 group message was transmitted on the primary frequency of 7240 kc and repeated on the secondary frequency of 7176 kc. As in prior occasions, no sign-off was noted at the end of the secondary transmission. The message appears to be valid, but attempts to receive and verify the message have been unsuccessful as of this time. The nature of operation tends to indicate that activity as being a routine transmission of MILSEC, a unit that usually has operations on normal voice only. (This will be covered in another section of the report on clandestine activities.)

This activity does not appear to have any connection with在职 offshore drilling sites, as called "MILSEC from MILSEC." As can be noted, the transmitting calls are different.

V. 115

Further investigation from MILSEC indicates that all the other clandestine voice transmissions had during the night, this case the single call from "MILSEC" asking for a procedure check, with no further activity noted. This transmission was made on 7240 kc as MILSEC on both frequencies.
