MEMORANDUM FOR THE RECORD

CIA SPECIAL COLLECTIONS

RELEASE IN FULL

2000

SUBJECT: Field Station Records

1. (U) The DO record schedule has been reviewed and approved by the National Archives and Records Administration. It states that all information that meets retention criteria is stored in the DO Records System at Headquarters. Information retained in the field is strictly for convenience and may be destroyed when no longer needed. All unique information must be sent to Headquarters for retention purposes.

2. (S) This records' maintenance practice serves two primary purposes. First, in the event of a hostile situation the field office can destroy their files and latter reconstitute them from information contained within the DO Records System. Secondly, we can satisfy DO search requirements by searching the records at Headquarters. This minimizes delays in responding to the request and minimizes impacts on field station personnel.

3. (S) The question specifically focused on Mexico City for the years 1963-1964 and Moscow for the years 1959-1962. We checked the record system to verify the fact and we do not hold any separate file collections from Moscow or Mexico City field stations.
