Subject: Possible Steps Relative to Ballistics

In thinking about what steps should be taken relative to the ballistics evidence, I put together a possible "laundry list," many of which we discussed or which you have also thought of:1. Find the WC raw data on the fragments.2. Interview any surviving WC (or FBI) personnel who worked on the fragments3. Get Guinn's raw data (both in HSCA files and from him).4. Interview Guinn.5. Get independent experts.6. Determine what additional testing can demonstrate.7. Determine what harm, if any, will come to the fragments as a result of additional testing.8. Interview HSCA Firearms Panel Members (particularly Champagne and Bates, since we have their CE 567 worksheets.9. Acquire any additional records which HSCA Firearms Panel members may still have in their possession.10. Test CE 567 fiber.11. Discuss possibility of follow through on HSCA recommendation on Bronson film, acoustics evidence, and any other reasonable steps that can be taken through technological advancements.
