I'd expect the ReviewBoard to do a better job evaluating the validity of such evidence. I'msurprised Marwell would voice an opinion on something he knows nothingabout without even attempting to follow up with the person who brought theinformation to his attention. I'm forwarding this to Ms. Sullivan in the hopes that she can have Marwell confirm or deny your representation of this conversation to us directly.I have a feeling Jim would rather talk to the board before he talks to other researchers about this. He has and continues to have concern for the few remaining people still alive who could be detrimentally affected by premature disclosure.Everything Jim has is not only solid, but backed up by additional materials that interrelate. The board will have to find that out by investigation, not rumormongering.
