Subject: Roger Peterson

just thought I'd pass this along:I spoke with Mr. Peterson today and he mentioned a project he is working on --- he said that he has talked to you about this.He hopes to have something to submit to the Review Board within a month. He seemed to feel some 'time' pressure (in the event we are not extended,) but I told him the more complete package he sends us, the better. He was toying with the idea of sending it as is, even though there is missing "connective tissue."At any rate, he said he has some more digging to do and hopes to send the info in about a month.
