**Subject:** document status request  
Dear Shawn:Thanks for being so patient while I looked into this. The good news is that the document (#178-10002-10093, 4/24/75 deposition of Richard Helms) is in the "pipeline." It has been reviewed for release by the CIA, but the CIA then referred it to the FBI for review. I will keep my eyes and ears open for any information on this document.Eileen
