Subject: Re: Re: Archives Releases JFK Material, rather quietly

Anthony, I appreciate the news articles from this "stealth" release. I can't think of a better adjective, but could you send me these articles in the body of an email rather than an attachment? I'm getting a lot of indecipherable gibberish. I wonder who was writing this shit that is very derogatory of JFK. Yes, there was a lot of derogatory bullshit information in this "stealth" release. I was disgusted that Tilley, very secretly, I think the appropriate word is "conspiracy", released files that were largely nothing but FBI bullshit defaming JFK. I was there. There was little else but AP people when I got there, around 9:30-10:00 am. In fact myself and Malcolm Blunt were responsible for one and I thought the only AP story on this release. All of them were totally clueless on what they could turn into a story. I suspect Gus Russo contributed to this crapola. As he was there. So he had to have been informed by Tilley, damn few if any were. Malcolm was there cause he is there nearly every day. He had no advance knowledge., I was there cause I was staying with him for the ARRB's open meeting held on Tuesday, for which there was not one damn word spoken about this. I wonder if they had any knowledge of this impending release. If they did they should have said something. Did they think I wouldn't find out about it? It makes me wonder if they did this before and I didn't know about it. Joe Backes
