Subject: J-track update

Jeremy, it appears that when I tried to send updates on to you, I succeeded only in creating new tasks. I don't know what I did wrong, but I figured I should probably stop it before somebody gets hurt. So, here is an update on the projects assigned to me in J-track. Ayers: To my knowledge, he has not written since shortly after I interviewed him in May 1995. I believe that we can close our chapter on him. No further action necessary. Lansdale: His papers are available at the Hoover Institute; they are not classified, so it would appear that there is no need for us to do anything more with them. No further action necessary. Request Records from Navy on defectors: We included requests on false defector programs, "Code 30" and otherwise, in our letter following up the compliance meeting on January 3. After allowing a little more time for a response, we will call them again to further follow up on this. Request Army Intel Records from IRR: They are in the process of photocopying those documents for us; we have been informed that they expect to finish some time in the first week of February. At that point, we will begin re-reviewing them, as well as setting up declassification sessions with all the agencies that have equities. Sheffield Edwards project: I searched the sequestered collection database and came up with a half dozen documents that I thought might have been what we were looking for, but none were post-assassination interviews. The next step is for me to go through the HSCA numbered files for any reports that Dan Hardway may have written on the subject, to see if I can find any clues as to the location of such an interview. Once that is done, I will make a formal request to Barry for it. DeMohrenschildt Project (DeMohrenschildt/Epstein/Oltmanns): Unfortunately, the furthest I have gotten on this project has been to make requests of Dave Montague to find Epstein and Oltmanns. I will follow this project up as time permits.
