**Subject:** Conversation with our NSA p.o.c.  
I called our NSA poc this afternoon to ask him several questions we discussed this morning at our meeting. Here are the results of this conversation:-- our new poc's name is also protected; we should avoid using it on the computer system-- he was of the opinion that we had the most recently updated disc; however, after I explained what we have, he said it is possible that a few additions were made after we got our version and that he may have overlooked this. He will get their version of the disc dubbed this week, though it will be somewhat difficult as their whole building works on UNIX and not DOS, while the RIF stuff is DOS, so he has to find an old DOS computer with dual disc drives in order to dub them. In any case, he knows we need a new version of the disc and is working to get it to us by the end of the week when he leaves.-- I asked about the 63 docs; he said that he will be sending us 61, as two of them were still in question as to how they are going to be handled. I told him we would like those as soon as possible, and he said that he will do his best to mail them to us by the end of the week.
