Subject:	Changes to Fast Track RIF Form
Body:	I added a new field to the Fast Track RIF form. The "Postponement Code 99 Comments" field is the place to type the alternate substitute language needed for postponements coded 99 using the CIA chart. The text typed into this field will go on the Final Determination Form with the introduction "In this record, postponement code 99 refers to the following special substitute language: ". In the past, this substitute language was entered into the "FDF Comments" field, but never made it onto the actual FDF. I fixed all of the past entries that had been done that way, and am in the process of getting the FDFs of documents that were already sent to NARA changed, so if you did a document this way in the past, don't panic; it's being taken care of. The "FDF Comments" field should still be used for miscellaneous comments about a record.Also, a few weeks ago, I added a "Military Button" to the RIF form as well. This is so that a document will generate an FDF for the Military Team, who just came up with their own postponement codes now that they've joined the wonderful world of Fast Track.
