Subject:	Computer question
Body:	Is it possible to convert a file on Microsoft Word to Wordperfect relatively easily? And if so, can it be done here? I ask because I may need to work on a project due Monday over the weekend and my computer at home currently has Word, not Wordperfect, as the word processing program. I don't know if I'll be able to get access to the office over the weekend so may have to work at home to finish. Am i just dreaming or is this possible?
