Subject: Sorting in file plan database
I have modified the file plan database to make the sorting work past the number 10. Valerie if you go into the views you will see the sorting view. Take a look at the entries and it should be clear how to format the first entry to make sure the sorting works, I made it as far as 1.8.1 before sleep overtook me. If you can work through the rest it will be finished. David: I looked at various options to improve the sorting and was going to write a formula to look at the entry 1.1 and then add the various numbers to make the sort work but this option with valerie as the gatekeeper seemed the easiest way to go.
