Subject: Inventory

I punched out a quick inventory database, take a look and if its ok I will start inputting on friday.It is called inventory. Tracy and Val have reader access.May I use Val to help me with the purchase order side. Also Tracy any other info that might be helpful to have?Also David what should be the dollar cutoff of items for this database and I assume we are not tracking supplies like paper and toner even though they cost \$\$thanks.
