Subject: Floating Word Perfect
This may not matter since everything still works, but my WP symbol is in the program manager instead of on the left side. This happened when I was typing in WP. Out of the blue, a choice came on my screen saying to delete files in the W drive because it was running out of space. I ended up in a loop that I finally got out of. Anyway, the WP symbol is not in its normal place. David has seen this phenom as has Kevin (on my computer only).
