Subject:	Review Track
Body:	Chet, I have two suggestions/questions with respect to the Review Track database. First, would it be possible to have the "future review" section for recommended postponements be a prompt? I find myself forgetting to complete this section and a prompt would be very helpful. Second, would it be possible to move back and forth between the various redaction screens rather than having to return to the main index to call up a particular redaction? I believe this would save an immense amount of time. Also, I am still receiving an e-mail message every time I send a document to Mary for review. Could you fix that? Thanks!
