Subject: Gum Shoe stuff

Jerrie just started to use the "Sent" key at the top of outgoing correspondence. It appears to work. I haven't received any tickler emails yet, is it possible the tickler wasn't working until it "read" that the correspondence had been sent? I guess I'll know 20 days from now. Also - Jerrie mentioned to me that there is a lot of "junk" in the body of the outgoing correspondence template, ie. extra tabs, commas, etc, etc. I've noticed a lot of that stuff also. Is there a way to clean up the extraneous stuff in the Gum Shoe template so that Jerrie doesn't have to go into reveal codes on each letter and clean it up? thanks - let me know what you think about the tickler.
