| **Subject:** | Formal notify form |
| **Body:** | I left the latest version in your box, still needs some work with the location of the date and perhaps the format of the RIF number?The way I have it set up now is you compose the Determination Tracking Form, this select all of those and use the Form Override in the print feature to select the Formal Determination Form for printing. Its a neat trick because the Formal form never gets saved only printed.In the database there is one document that I do not know how many postponements it has so I was not able to put in the Determination Tracking Form, all the other documents have it set up with the defaults of OPEN in FULL and No agency Appeal.Please page me at 1-800-449-7076 if you need any help getting this to work. |
