Subject: FBI Database

I have the view working but it needs to update all the documents in the database to make it work. I have started that process on my machine so when you come in it could be finished. I have not yet created the separate FBI database but will on Friday, in the meantime I have a simple view called RIF and DOCBIN <> 512 that may help. The Evidence Request form Macro is complete and can be used at any time. you select the documents you wish to send a request out and then use the macro. Depending on how many documents you send it could take a long time (1 hour or more for 100+) documents to print. See you on Friday.
