Subject:	Steps to print out Federal Register Notice
Body:	I have left a copy of the draft federal register notice in your in-box.Phil says we should have more than 10 FBI documents and he has sent you an e-mail with the branch documents. I have sent Mary a e-mail asking for the 2 CIA document numbers.We need to place them into the Archive database. For the CIA documents you may need to edit the RIF AGENDADATE field to make it 07/17/95, this is how all of the tracking is driven by the agendadate.Once all the document rifs are in the database goto the view called MEETING DATES, You can then click on 07/17/95 open the document and make sure all of the rifs are listed and press the print federal register notice button.
