Subject:	ZPrivate vs. ZSupervisor
Body:	1. Once you described these to me as being exactly the same, but my ZSupervisor view has one more document in it than my ZPrivate view. What's up? 2. Someone should be given access to correct obvious typos on RIFs, and others in the office could e-mail corrections to them. Another way would be to have a window when everyone has editing access, and people could save up their corrections until that time. Sort of like a "no-fines" day at the Library.
