Subject:	Privacy Act regs
Body:	Here is the most recent version. The exemption section is on its way, but still not finished. The boilerplate language is there, but I have not finished figuring out which systems of records should be subject to which exemptions. (I need to talk to you about this for a few minutes when you have time.) Also, Maya is going to fax to me a sample "justification" for claiming specific exemptions for particular systems so that I can draft that section.As you know, I copied the definitions of "assassination record" and "systems of records" and placed the pages in your in-box.
