Subject: jfk-arrb.gov registration complete.

OK we are for real now!!I would like to set up training on the internet for this Friday; however I know that Jeremy and Laura both have some things that might impact the roll out, Should I proceed or Should we talk on Thursday?To: Chet_Rhodes @ jfk-arrb.gov @ Internetcc: (bcc: Chet Rhodes/ARRB)From: starke @ foxtrot.worldcom.com (Sean Starke) @ Internet @ WORLDCOM Date: 09/25/95 03:18:33 PM CDTSubject: jfk-arrb.gov registration complete.Hello. This letter is being sent to inform you that the registration of your Internet domain, named jfk-arrb.gov, is now complete.-----

-Notes General InfoIncoming mail directed to user@jfk-arrb.gov will now be redirected to your notes server by the Worldcom Internet mail exchanger.Your outgoing mail to the Internet will be rewritten so that it appears to have come from your domain. The address will not have any references to Worldcom in it.-----

-----Notes Address RewritingAny messages coming in from the Internet for your new Internet domain name are routed directly to your Notes mail domain. There are several differences between Notes and Internet addressing syntax, so when addresses are rewritten, incoming underscores are returned into spaces and double underscores are turned into underscores.The reverse happens for mail going from your Notes domain to the Internet: Internet: Notes: user_name@jfk-arrb.gov User Name @ ARRB special__name@jfk-arrb.gov Special_Name @ ARRB Since all messages for your Internet domain are delivered to your server, addresses can be anything that match in your Name & Addressbook. To comply with Internet guidelines, you should create the names "hostmaster" and "postmaster" as aliases for the administrator or group of administrators responsible for your Notes server.The WorldCom Help & Services database includes a form that tells users what their Internet address is, so they can give that information to people on the Internet who want to send them mail.Since you've registered an Internet domain, this address needs to be updated. Please see the document "Your WorldCom Internet Address" in section 4-03 of the "WorldCom Help" view of the "WorldCom Help & Services" database. Besides informing users of their Internet address, it explains how to update that address now that you have an Internet domain.-----

-----To confirm that things are working for you, please send mail to me AS SOON AS POSSIBLE at hostmaster@worldcom.com so that I can inspect your headers and the address rewriting for your site. If there's a problem, I need to know immediately so that there is no danger of your mail service being interrupted.Thank you and please feel free to let me know if there is anything I can do to make your service better in the future.
