Subject: Re: ARRB Tracking Chart/Access to R-Drive

Sorry to make things so complicated, but I want to make certain I'm doing this right (and I'm a little skeptical of all these potentially different versions floating around). Nonetheless, do you wish me to copy your current R-Drive version to my E-Drive or the T-Drive, make the up-dates you requested, and then copy it back to the R-Drive -- and do this, presumably, anytime the R-Drive version needs updated? Two options: 1) authorize Chet to make the necessary changes in the system to allow me to make the changes directly on the R-Drive, or, 2) I could copy the R-Drive version to my E-Drive, make the changes, copy my updated version back onto the R-Drive and then you could delete the old one, ad infinitum. Let me know!
