Subject:	New macro?
Body:	We need to take a large number of documents (over 150) that currently are Status 50 and turn them into Status 4 so that I can assign them to the October 24 meeting as the consent agenda. I'd like to do it without having to open up each document and changing its status. Can you devise a macro that allows me to do such a thing, or do I really have to do all that work? This needs to be done in the short-term, so the faster you can give me an answer, the better (not a pressing, vital, have-it-yesterday kind of thing, but rather a get-it-done-as-soon-as-you-can thing.) Thank you, kind sir.
