**Subject:** Consent releases.

**Body:** After consulting with David about what to do with the postponement details which our staff has generated for documents that CIA recently opened as consent releases, I attempted to paste that information into the Consent Release database. First, I tried to paste just the document. That didn't carry the postponement details. So I selected all of the related documents and pasted them. They appear under the trunk document in the Consent Release database but the postponement detail forms cannot be accessed. What do I need to do to make this work?Thanks.
