Subject:	On my desktop
Body:	Author: Jonathan Goldstein/dpr @ dpr @ WorldComComposed: 09:54 AM TodayReply to : On my desktopI am running a 486 DX2/66 with 16MB of RAM. I am running Windows 3.1 and the 16-bit V.4 Client. I crash about every hour. Really. Yesterday I rebooted 12 times. I would not suggest running V.4 under Windows 3.1. I am waiting for the political-powers-that-be in my organization to move ahead with their planned Win95 rollout. Perhaps then I can get some work done without worrying about a crash.
