Subject: Church Committee database
I have put back in your box the SSCI transmission sheets to NARA; where you had placed a tab with a question mark, I have provided the correct record number(s). In addition, I have provided the box/folder sheets for Boxes 1-7. They are annotated, in that not all the documents listed were present, and sometimes records not listed were present. The sheets, as annotated, reflect the current physical reality in the Boxes at NARA. In addition, you already had -- but did not enter into the database -- the box/folder sheets for Box 40. They remain at the bottom of the pile Steve originally faxed to us. I would be happy to do data entry on this project, if there is a way to set things up to make that possible. Let me know. I gave Steve a copy of the printout you had previously generated --- he sends his thanks.
