Subject:	Computer snag
Body:	FYI. Not a big problem -- and I don't know if anyone else is experiencing it -- but lately, when I call up a RIF from the database, the entry in the "Subject" field is often repeated multiple times. For instance, if I were the subject, the name "Freeman, Joe" would be repeated over and over again, taking up several lines. This seems like a recent phenomenon and is of no real consequence unless it portends a more serious meltdown of some sort.
