Subject: HSCA intern computer project
Christopher has new interns coming in this week (Tues. through Thursday) and I thought of a data-entry project that would be useful for them to do involving the raw data the last bunch of interns generated for me out at NARA II: ie, records not presently available in the public version of the HSCA collection at NARA II. The project involves cross referencing the raw data they collected against our Review Track Archives and Consent Database so as to be able to strike off records that we've already processed (but are not yet interfiled) from the list of documents that need to be cleared. This no doubt seems unclear, but perhaps we could chat about it and see if it's something that's feasible to get set up before this latest batch of interns come and go. Many thanks.
