Subject: View correction in HSCA Cross-Reference database

Body: In looking at the list of records that have been entered on the new database, I notice that the record numbers listed in the left-hand column are cut off, leaving off the last three numerals. I think this is just a "view" problem, because when you enter any given record the whole record number is present.Thanks again for your help on setting this database up: the interns are working away on the project, to my great joy!
