Subject: WC photo records

I left on your chair a brief extract from NARA's Inventory of the Records of the President's Commission on the Assassination of President Kennedy (1973). Under "Subject-Numeric Files and Related Records", there are files (13-15) relating to photographs. File 14 specifically references FBI reports concerning same, and the brief description of one of them sounds alot like the document your researchers are referencing. What these entries mean is that, at least in part, there are specific and discrete places within the WC records where photos and information about them reside. Steve should be able to pull these files, which may or may not contain the photos your researchers are interested in -- but it's probably where the effort should start. I don't have any immediate plans to go up to NARA II, but can check in with you next time I go and, if you haven't sorted this out in the meantime, could ask Steve to pull these WC files for me.
