Subject:	Ideas on J-track
Body:	These may be too cryptic, but we can discuss them.Questions/Problems Creating new projects is a problem. They show up on the view but not on the pick list. What is the best way to do it? Can subprojects (leads) be transferred to another subproject?I tried to put new sub-projects in FBI Records and CIA Records, but they came up as not categorized. The form shows that I entered info correctly. Nor does it appear on Select keywords pick list. Cross references not showing up on sub-project formsWhen I try to create a subproject, an analyst name comes up automatically. (It is never the name I want.) Why? Why is there a need to enter Project name in subproject form? Why not make it automatic when cursor is on a particular project in the view? (It works better on the Agency Contacts database.) Add: source pick list for Leads Insert spaces after colons for viewsIs it possible to make a quick button for leads (access from anywhere in Lotus) such as is the case for e-mail?
