Subject:	re reviewtrack 124-10178-10088
Body:	Please take a look at this document. It is an imperfect duplicate that I tried to review as a separate, freestanding record with its own postponement details. I've entered the postponement details but, even after refreshing the RIF, we still have the language for looking up postponement detail information from the former trunk, but not the details created for this document. As we've talked about, we need to be able to manually split up packets to handle imperfect duplicates separately.Thanks for your help.
