Subject:	Fax system
Body:	I have updated the fax system from the database and created two groups for your use.One is called Desks and the Other is called Real People.I also understand now how to use the groups from the printing part of WP so I can show that to you.Thanks for the work in the database.You might want to try using the seal in the G: drive on the documents, I think it would look cool until we get the letterhead working, also as a test you should fax a copy to our fax machine first to look over how the system has treated the fax before sending to a group.Good luck.
