Subject:	NSA docs-- procedure suggestion
Body:	I just did a quick count... in these 70 or so documents, there are over 675 redactions to enter. I'm thinking that if I try and do them all at once, I will go not only blind, but insane as well. I'm remembering your statement that we need these "probably in a month or two." If that is the case, does tis sound like a workable plan: I will do perhaps 5 docs a day, (50-60 redactions), and just make sure to do a little every day. At that rate, I will preserve my sight and sanity, but I will also get them done by maybe the first week of January or so. Is there a pressing time limit on these things, or do you think I can attack them this way? Please respond. Thanks. Have a nice day. Void where prohibited.
