Subject: NSA documents from November Board meeting
I understand that you and Tim have been handling the NSA documents. According to the Federal Register notice, 65 docs. will be released in part, 3 postponed in full, and 8 will be available by consent release. In each advisory, I need to provide a brief summary describing the content of the documents on which the Board acted. This summary can range from an overall theme to a quick highlight list of the more interesting documents. Could we meet sometime soon (today if you can) to go over these documents so that I can include them in the advisory? I hope to get out early next week. thanks!
