Subject: Disk full error messages from 12/24
It was the DATA volume of the novell server had gotten full.I was running the MERGEFBI.prg in DBASE and it made olddocs grow past 450 meg. so we ran out of space.I will run olddocs off onto tape for long term storage and zap the database.I cleaned up several files that were over 100 meg and we should be fine now.Jeremy had a hard time getting into notes on 12/26 due to the NOTES.INI file getting erased on 12/24, I was able to walk him thru a resetup on the phone.
