**Subject:** Doug Horne Called Nancy Denlea  
CALL REPORT: PUBLIC DOCUMENTS Author: Douglas Horne/ARRB Date Created: 01/13/97 The Playe  
Description of the Call Date: 01/13/97Subject: Doug Horne Called Nancy DenleaSummary of the Call:After  
resolving confusion over an incorrect telephone number, I successfully reached Nancy Denlea today in Los  
Angeles (her correct number is 310-836-1416).She confirmed that her father left no collection anywhere of  
professional papers, and also said she has no papers or documents of any kind which would relate in any way  
to President Kennedy's treatment or wounds as observed at Parkland hospital, or to President Kennedy's  
autopsy at Bethesda, or to her father's observations, or opinions about the cause of death. She elaborated  
that her father left the few papers he had at her brother Richard's house in Colorado, where he thought he  
would spend the rest of his days; when that arrangement did not quite work out as well as expected, she said  
her father came to Los Angeles to live with her, and ended up spending the last year of his life with her  
instead, but left his few papers at Richard's house. She confirmed that she was the executor of her father's  
estate.She did have two recollections regarding the assassination. First, she recalled that her father was asked  
by the Warren Commission to prepare a written statement, which she believes he did, but has never seen. She  
said her father told her that he was very upset the Warren Commission never called him to testify. She also  
said that her father had once shown her photographs of the President's brain, and proudly said that it was her  
father who had ensured that the brain was saved. (She asked whether anyone had found the missing brain,  
and I said that it had not been found.) Other than these two recollections, she could not remember any other  
statements made, or opinions expressed, by her father about the assassination.I asked her if she was aware  
that her father had spoken with the HSCA, and she was not, but was very interested in knowing what he had  
told them.Since Ms. Denlea did not have a working FAX machine at home, and did not have access to one, I  
next read to her on the phone the Richard Sprague memo for file of March 18, 1977, in which he recounts  
Attorney William F. Illig's claim that Admiral Burkley had information indicating that others besides Oswald  
must have participated in the assassination (HSCA file number 000988, record number 180-10086-10295). I  
asked whether she would be willing to sign a document (to be prepared by the Review Board) which would  
indicate she had no objection to release of attorney-client information from Mr. Illig's files relating to this  
subject, and she said that she would have no problem with that, and would be willing to sign such a form. She  
did ask whether ARRB had access to her father's Warren Commission written statement, and any records of  
his contact with the HSCA, and I said that yes, we did. She asked that we provide these few documents to her,  
in exchange for her cooperation in signing the forthcoming ARRB waiver form, and I readily agreed to this quid
