Subject: this is not a joke

Body: Is there any way I can have quikcorrect permanently, and I mean permanently, disabled from my computer's WordPerfect? Yesterday and today, it has fouled up a document I am working on; each time, upon checking the appropriate screen, I find that quikcorrect is supposedly already disabled. Please do not patronize or dismiss this complaint -- I'm doing what I was told to do in last week's training session, to no avail; the problem is recurrent and non-imaginary.
