Subject:	Wrap-up memo on Military searches
Body:	I think that it would be a good idea for Tim to begin an ongoing memo that outlines his strategy for approaching military records and that describes where we looked and the kind of success we had. Because the military is in many ways a black box to the public, I think that such a memo would provide a useful map for researchers regarding what we have done and where we have been successful and where we came up against dead ends. This memo would be placed in our 4.50 series. I also think that it could be the basis for a significant contribution for our final report. I am placing this as a new project in J-Track. Let me know if either of you has a different or better suggestion.
