**Subject:** documents NBR in their entirety  
The recommendations were accepted by the Board. These documents were assigned to Box 51A. I tried to vote them as if they were like other documents, and then I printed a determination summary for them. It didn't look anything like it should. We need to publish them in the upcoming notice. Will you look at these, please?

Subject: documents NBR in their entirety  
I have entered 29 documents from CIA files that are copies of FBI documents as NBR in their entirety in the reviewtrack. They can be found in reviewtrack using the "find it -- NBR Status 60" view. I will put these in a labeled redwell folder in the back table in the SCIF. When the Board is in town next week, we will tell them about these documents and they will have the opportunity to review them. If the NBR recommendations are accepted, we will have to make sure that the FBI and the CIA get copies of the determination summaries for these documents, that the determination summaries contain the brief descriptions of each record I have put into the reviewtrack, and that the agencies understand that, while the records themselves will not be released until 2017, a determination form containing the brief description of each record will be made available to the public.
