Subject: Christopher's activities in the week of April 7-11

Here are my activities:1. Intern project wrap-up. The 11 interns from Noblesville completed their three days with us. I developed, facilitated and oversaw their three large projects, as well as adding to a broad range of the students' activities outside the office. I attended and contirbuted to the lobbying session in Congressman Burton's office. After the students' departure, I completed the post-internship phases of the project.2. Dr. David Vanek. Completed ARRB business with Dr. David Vanek. Unless ARRB is contacted by Vanek in the future, our involvement with him is now closed.3. NSA material. [Screened by: NARA RD-F on October 12, 2016 according to the John F. Kennedy Records Collection Act of 1992, 44 U.S.C. 2107, Section 6(1)A] of NSA and I have been dealing with each other all week to try and clear up some discrepancies in previous NSA submissions to the Board. (Basically, the NSA failed to highlight material in some documents that they should have, and then the Board voted on the incorrect reviews. We have been trying to figure out how to address the issues and handle the documents.) David Marwell is aware of the developments and decisions in this case. In addition, [Screened by: NARA RD-F on October 12, 2016 according to the John F. Kennedy Records Collection Act of 1992, 44 U.S.C. 2107, Section 6(1)A] has sent us 49 other NSA documents to be handled at the next Board meeting, and we have been trying to prepare them for this meeting.4. Cuba. As per a request from Jeremy, Manuel, Irene and I have been searching, reviewing and compiling documents related to Cuba for a project which is known to you.5. Army declassifier. At the outset of the week, I was dealing with trying to get Randy Rakers assigned to us for a period of a few days to review and declassify as much of the Califano papers as possible. It became apparent that with the kids here, I had too much to do, and after making a couple of initial contacts, I passed this task off to Joe Masih, and he has completed most of the work on this project.
