Subject: Week of April 10-16

FBI team activities for week of April 10-16 FBI team Generally Ron should be getting his FBI badge this week. Carol told me that his paperwork is processed and that his name is in the computer. He just needs to have his picture taken and then he'll be ready to go to the FBI unescorted. Any news on Sydneys clearance? Also, Manuel is going to assist Kevin in his review of the Cuban files (see below). If it is okay with you, I will talk to Carol about getting an FBI badge for Manuel so that he will not have to be escorted in and out of the FBI. Outstanding Requests for Additional Information (1) Hoover and Tolson Records -- Follow Up on FBI-36 Sydney went to the FBI FOIA reading room to review the Hoover office and phone logs that are publicly available. He reported that 95% of these materials are already open to the public and need not be included as a separate group of files in the JFK Collection. We will include a memo in the Collection that states that the logs are available at the FBI. For the few redactions that exist, Ron will determine whether we need to ask for the FBI to release the information pursuant to the JFK Act. When Sydney first requested the logs in the reading room, the reading room people gave him another group of logs that appeared to be substantive phone messages, rather than just lists of visitors and callers. This group of logs is more heavily redacted than the other logs. I talked to Carol about these logs and she agreed to provide them to Ron for his review pursuant to our request FBI-36. I discussed with Carol Jeremys decision to make a thorough effort to track down Hoovers files. She told me that the FBI would help as much as possible, but unless files were integrated into the central files or specifically saved as a group, current employees of the FBI probably wont be very helpful. She asked whether Jeremy had contacted Cartha DeLoach yet and I told her that I didnt think that he had. (2) New Orleans and Dallas Administrative Files -- Follow Up on FBI-17 I am continuing my review of the Dallas Admin. file at the FBI. It contains more assassination records (maybe 15 so far) than the New Orleans file. I should be able to complete my review today. (3) Cuban Groups -- FBI-30 The FBI has been pulling the files for our big request for files on Cuban groups. Kevin and Manuel can start reviewing these now. Review of these files is going to be time-consuming, as the files already fill 3 vertical file drawers at the FBI and there are 2 more groups files that the FBI has not yet pulled. Potential Requests for Additional Information (1) Contacting Assistant Directors of the FBI I met with Ron and Sydney on Friday, after Sydney returned from his office/phone log review at the FBI. Ron is still quite interested in tracking down former Assistant Directors of the FBI Mohr, Sullivan, DeLoach, and Belmont (or their families/estates) to determine if they have records. We agreed that Ron will take responsibility for contacting these individuals and/or their families. He will provide me with reports on his progress. (2) Secret Service Leads I talked to Jeremy about Joans suggestions about
