Subject: Alarm System

I think there is some kind of malfunction in both the front and the SCIF keypads. The alarm went off this morning when Cathy opened the front door - she had to punch in her code five times before it took. When I opened the SCIF, the alarm went off again. I had to punch in my code four times before it took - by then the alarm went off. It kept coming up "Invalid entry" and "try again." Its happening to both of us would indicate the problem is with the system.
